

Energize Your Environment

State-of-the-art technology, design and durability are the essence of Protective Comfort Group flooring and the brand Pavigym®.

Much more than just a floor, Pavigym defines space while enhancing sporting safety. The unique air flooring system retrieves the user's energy and helps them enjoy a healthier workout. This is the mission of Pavigym and Protective Comfort Group.

Aerobic

Specific flooring for aerobic classes.

The Air Flooring System technology offers one resistant layer that allows free flowing movements without slipping or blocking. Also provides absorbency, comfort and security for movements. Pavigym Aerobic contains millions of micro air-bubbles which absorb jump impact while protecting against injury.

- **Aerobic:** The ideal solution for group exercise studios (aerobics, step, cardio-box, etc).
- **Combi:** The solution for group exercise classes with multiple uses, where heavy accessories are moved around, such as spinning bikes.

Free Weight

Pavigym's Air Flooring System gives Pavigym Free Weight a surface which is double layered. Provides high resistance against scratching and gouging, and offers high shock absorbency which protects the subfloor. When a weight of dumbbell falls, millions of micro air-bubbles compress, cushioning the fall silently and safely, as air provides excellent sound insulation.

- **Free Weight HD (High Density):** HD (High Density): the increased density provides the ideal solution for the Free Weights area, with innovative colours and designs.
- **Free Weight S&S (Sound & Shock absorption):** excellent acoustic insulation specifically designed for areas where increased sound and vibration absorption is essential in the free weights area.

Fitness

In addition to all the design and personalization possibilities which Pavigym offers, maximum protection is also provided against marks and noise for indoor cycling and cardio areas with machines.

- **Fitness 7,5 mm:** a **new product** with improved density formula. Fitness is the most resistant solution against marks. The new interlocking system is designed to fit **perfectly with Pavigym Free Weight HD** within the same room. Optimum performance can be achieved without the need for fixing agents or adhesives.
- **Combi:** Additional comfort in fitness and cardio rooms, where it is necessary to move heavy equipment around to carry out other activities.

Fitness Special Products

Pavigym has developed Special Fitness Products, a new range of products designed to offer extra protection in the areas where it is most needed. Protects the sub-floor in fitness and cardio areas by avoiding marks, scratches and stains due to sweat and liquids, which can be spilt during exercise. In addition, the user and indeed the machine are protected, by offering an anti-slip surface which provides better stability and absorbs machine vibrations.

Main Specifications	 2 pieces	 Extension	 Spinning	 Vibro

Designed to protect the flooring surface beneath fitness machines, (treadmills, steps, bikes...)

Three concepts define the advantages of Stera:

Aesthetics: Available in several colours, replicating the texture and aesthetics of wood or marble.

Personalization: Can be personalized with the logo of your facility.

Modularity: With interlocking tiles which enable the creation of bigger or smaller surfaces, it is therefore adaptable to any type of machinery available on the market.

Stone Grey

Black Marble

Beechwood

Wengue

Designed for Pavigym and **Power Plate** to minimize effects that vibration platforms transmit to the sub-floor. Vibro guarantees a vibration reduction of **50%** from the base of the machine to the sub-floor. Combined with Pavigym flooring, vibration reduction stands at **75%**. Applicable to all vibration platform machinery.

Black

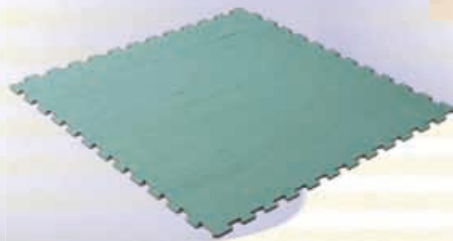

Body Mind

Pavigym Body-Mind is extremely comfortable which makes it ideal for floor exercises such as Pilates, Yoga, Stretching, etc. As a result, it can be used barefoot or with appropriate footwear.

THERMAL INSULATION

Protects the user from heat loss when in contact with the floor, making exercise a more enjoyable experience. With Pavigym, you can even reduce your heating and air-conditioning bills as the millions of micro air-bubbles provide excellent thermal insulation.

Tatami

The most advanced technical solution for martial arts. Designed to absorb heavy impacts and gradually restore energy. "Bouncing" does not occur, due to the elastic properties of the materials used in the Air Flooring System technology.

- **Tatami 20 mm:** Designed for fast, fluid and safe movements in Karate, Taekwondo, Kung-Fu...
- **Tatami 30 mm:** A higher shock absorbency capacity for heavier falls in Judo, Aikido...
- **Durotami:** Designed for professionals and competitions. The higher density and hardness enables greater fluidity of movements.
- **Tatami Kids:** The safest option for children in martial arts areas, or children's play areas within the sports facility.

ANTI-SLIP AND ANTI-BLOCK

The Pavigym surface allows a level of adherence which eliminates slipping without blocking the foot during jumps or turns. The floor temporarily deforms at the point of pressure to give lateral support. Therefore, whatever the angle of the movement, the floor will compensate accordingly to avoid injury.

Wet Areas

For wet areas, a solution which provides maximum anti-slip protection, and is easy to install and clean. The interlocking system makes it easy to roll up for extensive cleaning beneath. It is modular and adaptable, as the size and characteristics of the tiles enable you to cover any area or corner. Available in three colours which will add value to the aesthetics of changing rooms, swimming pools and other wet areas.

Accessories

FINISHINGS, TOOLS AND SUN FILTERS

Pavigym offers you an extensive range of accessories in order to guarantee a perfect finishing solution, and an optimum maintenance of your flooring.

Finishings

Skirting Boards: Our selection of Pavigym skirting board solutions facilitate a perfect and elegant finish for every installation. The expansion gap against the wall, necessary with all Pavigym products should be respected and can be covered with one of our elegant solutions, avoiding the accumulation of dirt and dust.

Wood

Aluminium

PVC

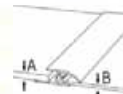

EVA

Transitions: Available in aluminium and PVC, these are the perfect solution to join two floorings of different thicknesses, thus avoiding potential trip hazards.

Tools

To help you install your floor more effectively and efficiently, Pavigym advises you to use, and provides you with the following tools:

Installation Kit

Scroll Saw

Mitre Saw

Workbench

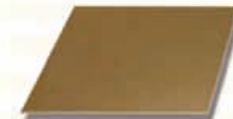

Coloured Putty

Pistol

Surface protector

Sun Filters

Pavigym recommends you to use sun filters in areas with windows or direct sun exposure. This is to avoid damaging effects on the installation.

Some recommended manufacturers:

3M; visit www.3m.com

Solar Screen; visit www.solar-sreen.com

FIXING AGENT, ADHESIVES AND CLEANERS

In areas with direct sun exposure, or entrance areas to the facility, Pavigym recommends you use the following products which enable fixing or sticking of the tiles without damaging the sub-floor:

Fixing agent

This product can be used as a fixing agent to avoid the flooring sliding over the sub-floor, or as an adhesive.

Polyurethane adhesive

Adhesive appropriate if risk of humidity or direct sun radiation exists.

Antistatic cleaner

Avoid the potential for static electricity in the room.

Cleaning products

Pavigym recommends using the following cleaning products.

Cleaner R280

Appropriate for daily use and for all Pavigym products.

Cleaner R

It can also be used as an intensive cleaning product for all Pavigym products.

Cleaner PU

Appropriate for Pavigym Traffic. It can be used as an intensive cleaning product and for maintaining floor coverings with a polyurethane surface layer.

Elatex

For persistent stains and punctual use. Suitable for all products except Pavigym Free Weight HD.

2-MONTHS PACK (Pack suitable per 100 m²) Includes: 20 litres R280 Cleaner, 1 bottle of R Cleaner and 1 bottle of Elatex.

The Pavigym Air Flooring System Technology combines high performance polymeric materials with a higher elasticity grade "E2", with the shock absorption and isolation effect of air. Millions of micro air-bubbles in the flooring absorb the impact and retrieve the energy, providing better protection and control of movements.

IMPACT ABSORPTION: an impact on the foot transmits energy up through the skeletal structure, muscles, tendons and joints. This energy is adequately absorbed by Pavigym to minimize the overall impact on the body.

ENERGY RETURN: The AFS System momentarily compresses on impact and returns to the original position, producing a gradual return of energy or "spring".

e₂ polymers

Our high performance polymeric "E2" have been developed taking into account the sustainability criteria.

EVA rubbers used in Pavigym products possess the Oeko-Tex Standard 100 Certification, which guarantees that no noxious substances are included in the product and that it is not harmful to human skin.

How to install?

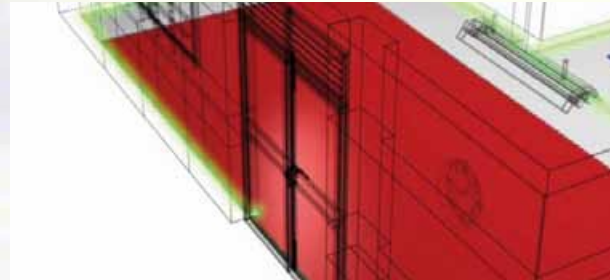

Pavigym is very easy to install. Nevertheless, a series of straightforward requirements and considerations should be taken into account. All of the necessary information can be found in the Installation and Maintenance Manual.

1

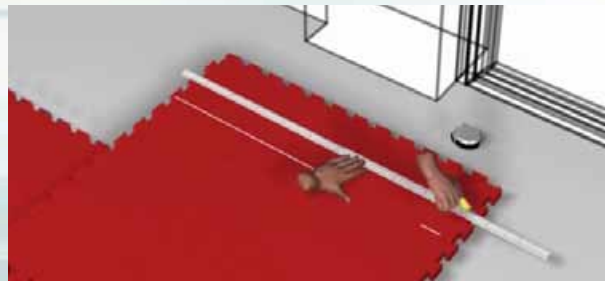

Place the first tile **in the centre** of the room, away from walls, which may not be straight. Continue placing tiles in spiral format, next to the starting tile.

2

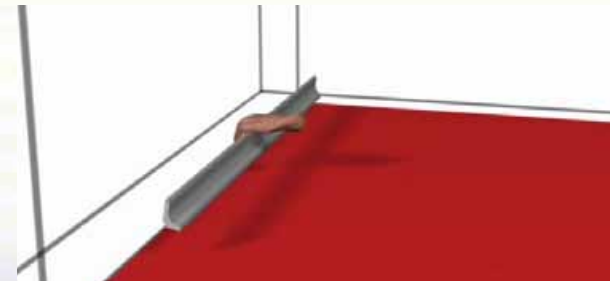

Leave the perimeter tiles until the end of the installation, always **respecting the expansion gaps between tiles**, walls and pillars in order to protect against possible contractions or expansion of the flooring.

3

Cut the tile with a cutting knife.

4

Finish the installation by placing a **skirting board at the wall**, covering the expansion gap.

INTERLOCKING INSTALLATION SYSTEM:
Easy interlocking system between tiles, allowing a quick and easy installation without adhesives, special tools or special preparation of the sub-floor.

STICK INSTALLATION SYSTEM:
System with all the advantages of Pavigym's interlocking installation, but requires a fixing agent to obtain an optimum result. Applicable only to specific product lines.

Pavigym Training Concepts are a new innovation in which the flooring becomes an interactive part of the training session. Guided by the icons and drawings on the floor, the user is able to diversify and complete their training schedule, while enjoying a personalized area. Provides an elegant and comfortable environment which is suitable for individual training and/or group exercises. Three different products which fit the needs of both the user and the facility:

flex area by PAVIGYM

An ideal interactive area to carry out various strengthening and stretching exercises in an intuitive and enjoyable way. The illustrative board with basic exercises is suitable for users of all ages.

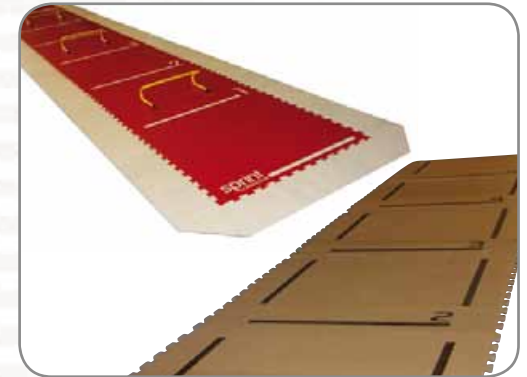

Pilates area by PAVIGYM

Two exercise levels to work on mobility, stability and suppleness, based on the Pilates Method. Comfortable and with thermal insulation characteristics, enabling you to exercise either barefoot or with appropriate footwear.

sprint by PAVIGYM

Enables the realization of explosive exercises like multi-jumps, speed changing, sprints, strides, etc. The tiles contribute in measuring the distance completed. It can be integrated into the existing Pavigym floor, or as a stand alone "on top" product using Pavigym Fitness.

The most advanced solutions in sports flooring

Flooring is a fundamental element in the design and image of any establishment. This is why we strive to offer an extensive range of colours, textures and finishing solutions, which enable our clients to choose and decorate with Pavigym products.

Design your studio with the Pavigym virtual simulator; you can easily see hundreds of realistic combinations, designs and colors for your ideal facility.

www.pavigym.com

Pavigym colours in this brochure are printed simulations and may differ slightly from the original product.

Pavigym Simulator

Very few withstand the test of time.

**comfortgym**
the long lasting mat

Specifically designed for use in sports facilities where high performance and durable materials are required, **comfortgym** is the most resistant mat on the market, while also providing users with maximum protection and comfort.

The perfect mixture of resistance and durability, combined with an extensive range of colours, shapes and sizes, adaptable to all current aesthetic trends, make **comfortgym** the best exercise mat available.

www.comfortgym.com

Composed of high performance polymeric materials, **comfortgym** mats combine elasticity and comfort with high-use and abrasion resistance, meaning they are virtually unbreakable.

Thanks to its reinforced O-holes, it is very easy to hang **comfortgym** mats, thus making the most of the room space available.

comfortgym is waterproof and resistant towards sweat, possessing an antibacterial protection which avoids the development of germs and fungi.

Very easy to clean with a simple cloth and standard cleaning products.

Provides the ideal environment for children in kindergartens, primary schools and play areas. Manufactured with Air Flooring System Technology, Paviplay offers maximum protection and comfort. Easy to assemble/disassemble and can be stored conveniently in piles due to its "puzzle-like" system which permits the creation of a play-area in minutes. It is didactic, thus facilitating the development of physical activities, crawling, and psycho-motor skills. The colours and textures favour the development of both tactile and spatial visual perception.

A safe environment for children

ANTI-BACTERIAL PROTECTION

Paviplay is manufactured with safe and sanitary material, protecting against fungi and bacteria.

HIC

Paviplay has been subjected to extensive safety testing in AIJU, a leading technological toy testing institution, where it achieved the HIC certification. This ensures shock absorbency against the frequent bumps and falls of toddlers and children.

All Paviplay products can be obtained with optional Cfl fire resistance, according to the EN 13501-1 Norm.

www.paviplay.com

Classic

The four colors and different textures available offer stimulation for toddlers while providing ultimate protection from bumps and falls. Paviplay Classic has been designed for barefoot use.

MAXI-KIT AND MINI-KIT

Available with centre, edge and corner tiles.

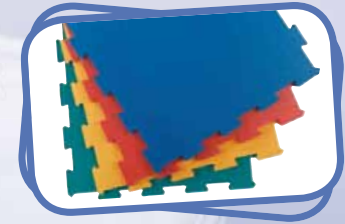

WALL PROTECTORS

Achieve increased protection in the room against bumps and falls.

TILES

Available in three thicknesses and sizes.
